

Leading the charge in EV payments

NMI makes it easy for drivers to pay for EV charging by card, phone, app, or online prepayment. We support the growing number of Charge Point Operators (CPOs) and manufacturers, with a multi-channel payment system, as they deploy new fleets of charging terminals across the globe. NMI supplies our market-leading gateway service to the majority of the UK EV market. From manufacturers and operators to app providers and merchants.

Some key partnerships include:

- **Gilbarco**
- **Tritium**
- **ABB**
- **Delta**
- **Shell Recharge**
- **BP Chargepoint**

BENEFITS

A choice of contact and contactless card readers to suit your chargepoint hardware and installation environment

Resilient gateway infrastructure - 6 data processing nodes spread across the globe ensure industry-leading platform uptime

Easy cardholder-not-present payment via mobile app, web and QR codes

Certified with the broadest range of bank processors and acquirers

Simple, quick and secure integration so you can begin processing charging payments within a few days

Supported devices operate with OCPP (Open Chargepoint Protocol) to meet the latest industry standards

Put our experience to work for you

Providing payment flexibility while remaining compliant with the latest payment directives is becoming increasingly difficult and complex. NMI technology powers innovation, opens up opportunity and provides secure technology to help businesses succeed.

A powerful platform that keeps you in control

ROBUST TERMINALS

A range of EMV certified payment terminals from Payter, OTI, CPI, UIC, FEIG and Ingenico. Each is certified with a number of UK acquirers and US processors, and some can be enabled under the NMI PCI Validated Point-to-Point Encryption system (PCI P2PE).

THE NMI GATEWAY

The NMI gateway is where payments are directed to the acquiring banks for authorization and settlement, quickly and securely. We provide the highest level of payment security available in the market today via our fully PCI DSS Level 1 accredited infrastructure, and support payments in the US, throughout Europe and the UK.

DEVELOPER APIs AND SDKs

We make it simple for operators to accept payments directly from the chargepoint, via secure in-app mobile payments, and through your website - by using NMI's easy to integrate APIs and SDKs. These allow the chargepoint controller and back-office system to interface with the payment terminal or website payment page.

REPORTING AND MANAGEMENT

We allow you to manage all of your transactions in one place with our intuitive online reporting system. It allows you to produce customized reports, process refunds, and board new terminals onto the NMI gateway.
